

## QUALITY POLICY

Our strategic view is to become THE favoured supplier of the cast rolls mills.

For it, we must:

- be reliable from the point of view quality, performances and dead lines
- be the external support coming with our customers in the analysis and the resolution of the rolls mill problems
- be a company financially strong getting the means to guarantee a continuous industrial development
- be an active, flexible open-minded and in a continuous search for progress and innovations team.

From this strategic view, we defined actions in shorter or longer terms.

Our targets, as well as this quality chart, will be yearly revised during the management review.

The Quality Policy of AFS SEDAN integrates an ongoing research for improving:

- by taking into account the context (market, competition, economy, legislation,...) of our company
- by the deployment of an approach based on the control of the risks and the opportunities at every level of the organization.

I'm committed to promoting the quality approach and to dedicating the necessary means to the management of this policy.

As stipulated by strategic targets previously detailed, we must be a team which fully undertakes into the reach of its targets.

I'm counting on each of us

  
Olivier GIOT  
Managing Director
